

Thank you to the State of Wisconsin! They have allowed my family to eat dinner together uninterrupted. We no longer have to get up to receive a call or just let it ring to the machine. Before the Do Not Call list was established we would receive up to 5 or 6 calls a night. We are a family and do not want to be interrupted by strangers that want to sell us their product. Family time is precious and I do not feel strangers have the right to take that away from me just because I have a telephone. Most people in Wisconsin are happy with things the way they are. Don't mess with a good thing.
